**Land Rover Design - 70 Years of Success** Jun 20 2022 A landmark new history from design journalist Nick Hull, Land Rover Design – 70 years of Success offers a detailed insight to the company's design story, from the early days of Land Rover in Solihull to the latest generation of the Range Rover Velar in 2018. The Land Rover was born from a desperate need by the Rover Company to develop a stop-gap model to provide cashflow in the post-war years. The original aim of a simple 4x4 agricultural tool soon developed into a multi-purpose vehicle that became the mainstay of the British Army and produced numerous offshoots for the emergency

services, police, forestry and aid agencies worldwide. This book details the personalities involved in the various projects since the late 1940s up to today: the designers, modellers and studio engineers. It charts the development of Land Rover and Range Rover projects in the UK, particularly those designed in the Gaydon studio that opened in 1996, and is still a key part of JLR's design resource. From the early days of chalk drawings and wooden models to today's digital renderings and milled clays for the latest Range Rover Evoque, Land Rover's designers and technicians have never been short of creativity. This book tells their story, in their own words, and is a fitting tribute to the spirit and ethos of Land Rover design and engineering.

Land Rover Discovery - 25 Years of the Family 4 x 4 looks in detail at the four generations of Discovery, including full specification details and production histories. Topics covered include the design and development of the original Discovery in the late 1980s, and the move into North America; the new 300Tdi engine and R380 gearbox of 1994, and the BMW takeover; Series II models of 1998-2004, and Land Rover's move from BMW to Ford; Discovery 3/LR3' - 2004-2009, and the new TDV6 engine, developed by Jaguar; Discovery 4/LR4' - the all-purpose family luxury car; special editions and derivatives of all four generations of Discovery, including Discoverys for the emergency services and the Camel Trophy and G4 Challenge competition vehicles. Land Rover Apr 25 2020 Sunday Times Bestseller As quintessentially British as a plate of fish and chips or a British Bulldog, the boxy, utilitarian Land Rover Defender has become an iconic part of what it is to be British. It is said that for more than half the world's population, the first car they ever saw was a Land Rover Defender. It mirrors many of our national traits, stiff upper-lipped and slightly eccentric. The car has remained relatively unchanged for nearly seven decades and has spawned an industry that includes dozens of publications, car shows, clubs, associations and even model car collectors who dedicate their lives to the Land Rover. To understand this national love affair, Ben has travelled the length of the British Isles in a Defender, spending time with fellow Land Rover enthusiasts: from visiting Colonel Blashford-Snell, who crossed the jungles of the Darien Gap, to patrolling the streets of Belfast with the Police Service of Northern Ireland (PSNI). Ben has met folk who have converted their beloved Defenders into everything from hearses and coffee shops to works of art and fire trucks. He has travelled from the Red Wharf in Anglesey, Wales onto the Western Isles of Scotland and Islay, the island used as a testing ground by Spencer Wilks in 1947 to put several of the early Series Land Rover prototypes through their paces. After 67 years and 2 million vehicles the Land Rover Defender has ceased production, and this book is a fitting tribute to this most British institution which has stood as a beacon of durability and Britishness across the world. Every Land Rover has its own unique story to tell. This is the story of the world's favourite car.

**They Found Our Engineer** Mar 25 2020 The British Land Rover 4x4 has grown from 1948 to become one of the world's leading automotive brands. Exactly how it all came together back in the late 1940's and early 50's has been the topic of interest and debate for many years. This was until two Australian enthusiasts, Michael Bishop and Alex Massey quite literally stumbled across senior member of the original Land Rover development team, Arthur Goddard living in Brisbane, Australia in 2009. The discovery led to

many of the myths and tales surrounding the early vehicles to be heard as it happened from Arthur's point of view. Then to a trip by Arthur to visit his old work place in Solihull and to the vehicle that he helped bring to life back in 1948. The book contains both a technical and human side to this incredible story as well as a great reunion between Arthur and his old colleague Spen King who went onto design the Range Rover in the 1960's. This is truly a unique story from the time of post War World two Britain to modern day Australia and how the iconic 4x4 grew up so quickly in the 1950's to become the world leader that it is today.

**History of Land Rover** Sep 11 2021 The Second World War proved, among other things, the value of a basic 4-wheeled drive vehicle of rugged construction. The success of the American Jeep inspired the Wilkes' brothers, Maurice & Spencer, who ran the Rover car company, that a British version was likely to be well received. Launched in 1948, customers were never in short supply for their creation, the Land Rover, although there were some unexpected owners for such a sparse and utilitarian car, including King George VI and Winston Churchill. Once the British army embraced it as their vehicle of choice, the Land Rover's place in motoring's hall of fame was secured. Since those days, the company has gone on to invent the concept of the luxury 4 x 4 with the launch of the Range Rover in 1970 and has added further to the distinguished stable with the Discovery and the Freelander and in recent years the Vogue model of the Range Rover.
