Foundations of Economics was developed on the premise that economics is a core competency for the responsible citizen and a foundation tool for every type of career. The Bade/Parkin package is designed to encourage learning by doing. Each chapter concentrates on a manageable number of core concepts that are called out in the beginning-of-chapter Checklist. Students know what they're expected to learn and are given the chance to apply those lessons to real-world problems. Practice is the cornerstone of the innovative Bade/Parkin approach. A full page Checkpoint containing a Practice Problem with solution and a parallel Exercise immediately follows each main idea. Checkpoints serve as stopping points and encourage students to practice using a concept before moving on. Different learning styles need different learning tools, and Bade/Parkin's extensive and tightly integrated web environment puts students in the driver's seat and allows them to use technology in the way that suits them best. Microeconomics focuses on individual units like a consumer, a producer, a firm/industry, a commodity, etc. It analyses the

behaviour of one market variable at a time. In microeconomics, the commodity markets are divided into perfect competitive markets and imperfect markets. 'Microeconomic Theory and Application (Part II)' deals with imperfect markets that are broadly classified into monopoly, monopolistic competition and oligopoly. Apart from this, the book also deals with the concept of factor pricing and its various aspects, in detail. This book supplements the classroom teaching and has been developed as per the syllabus of Bcom (Hons) II year course of the University of Delhi. The book would prove to be equally useful for all microeconomics courses at the graduation level across all the universities in India. This is not a traditional encyclopedic text filled with technical details. Rather it is a modern, "back-to-basics" book written expressly to promote economic literacy and engage students in learning about how economics affects them as citizens in our society. Coupled with pedagogical innovations that are well-grounded in learning theory research, the text's visually effective design and captivating content inspires students to actually read the chapters. It succeeds like no other text in taking the intimidation out of economics and in meeting its goal of explaining the material in a manner that will "bring students the same feeling of excitement and relevance" the author felt when taking his first economics class.
