Environmental Change in South-East Asia Nov 10 2021 Environmental Change in South-East Asia brings together scholars, journalists, consultants and NGO activists to explore the interaction of people, politics and ecology. Ostensibly green activities - plantation forestry, eco-tourism, hydro-electricity - are revealed as guises used by elites to promote their own political and economic interests. Highlighting fatal flaws in presently exclusive economic and ecological approaches, the authors stress that neither the quest for sustainable development nor the process of environmental change itself can be understood without reference to political processes.

I Want Out Feb 25 2023 We do not see things as they are, we see things as we are. When you change your perception, you change your results., Custody, and Child Support Sometimes life can take turns which we are unprepared for. Divorce is one of those detours in life that rock the foundation upon which we live. Without proper guidance and support, divorce can seem like an overwhelming and frightening path. Fortunately, there is hope! This book provides that vital guidance and support. In "I Want Out," Family and Divorce Mediation Expert Sean Collinson provides practical and psychological insights which are derived from his many years of experience in the family law system. In this must have book, Sean educates and helps change perceptions in order to achieve successful results by operating in reality verses heated emotion. Sean writes from the heart, from experience, and from the point of view of an ally. "I Want Out" provides the reader with insights, ideas, and wisdom on divorce, child custody, child support, mediation, lawyers, and so much more. It is filled with information to get you successfully through these challenging times. "I Want Out" speaks to those who are contemplating divorce, going through divorce or are unmarried and dealing with paternity issues and concerns. It lends an opportunity to evaluate the situation, create a plan of action, and ultimately, to make educated decisions toward a solution that can help you get your life back on track and allow you to move on. **AVOID COMMON MISTAKES - PROTECT YOURSELF!** "You don't get what you deserve; you get what you negotiate." -Sean Collinson - Take control of your situation with assertiveness and strategic thinking - Learn how to deal with difficult personalities - Learn how to protect yourself and make better choices

Plant-Microbe Interactions May 16 2022 A constant research effort to understand plant-microbe interactions makes it indispensable to keep abreast of the latest research developments. Researchers from a range of disciplines have used multiple approaches to infer this field. With the advent of next-generation techniques, both molecular and computational, the field has entered a new phase. These approaches often result in massive information, which is sometimes tangled and in need of further analysis. These types of analyses also require cutting-edge data analytics as well as efficient statistical models. **Plant-Microbe Interactions: Harnessing Next-Generation Molecular Technologies for Sustainable Agriculture** provides a comprehensive picture of the modern-day analytics and approaches being used to provide insights into the interactions between plant and microbe. A wide range of technologies are explored along with practical guides toward these techniques. A detailed understanding of omics data in various areas could be obtained from this compilation. **Key Features:** • Crosstalk between plant and microbe • Overview of advanced molecular techniques used to study plant-microbe interaction • Practical guide to technologies such as NGS • Omics data analysis used to study plant-microbe interaction • Role of soil metagenomics • Advanced technologies such as nanotechnology and CRISPR serving to study plant-microbe interaction This book will serve as a great reference to various next-generation techniques in the field of plant-microbe interaction, thereby helping to better understand the mechanism. This will also help budding researchers to shape their research in similar areas.

Beyond Responsibility to Protect Apr 27 2023 The history of international law is replete with concepts that have generated change: individual criminal responsibility, common heritage of mankind and sustainable development to name but a few. These are concepts that have influenced the scope, structure and purpose of international law. This book explores the extent to which Responsibility to Protect (R2P) possesses the same transformative potential, showing how R2P shifts our understanding of both the potential and practice of international law. Responsibility to Protect is both an ambitious and an ambiguous concept in international law. Ambiguity creates space for debate and the potential for legal development, but it may also generate misunderstanding, false expectations and uncertainty. Despite its ambiguity, R2P has quickly found a place within international legal texts. At the same time its ambiguity -or rather the tensions the concept generates - has also helped generate an enormous range of scholarship. This collection of essays presents a more fundamental critical evaluation of R2P, exploring how it interacts with existing concepts and values, and how this influences normative developments within international law. In particular, the essays explore the influence of R2P upon sovereignty as responsibility, the continued advance of positive human rights obligations and the safeguarding of international community interests. These themes are explored in a range of essays written by new and established scholars. The essays explore the moral and political foundations of R2P, the expansion of R2P to non-state actors, and the interaction between R2P and certain branches of international law, such as use of force, responsibility as liability, humanitarian law and international criminal law. With contributions by: Richard A. Barnes, Vassilis P. Tzevelekos, Henry Jones, Markus P. Beham, Ralph R.A. Janik, Tony Ward, Nabil Hajjami, John Heieck, Julia Schmidt, Nigel D. White, Antal Berkes, Jennifer Dee Halbert, Hitoshi Nasu, Humberto Cantú Rivera, Kasey L. McCall-Smith, Lucas Lixinski, Sophie Rondeau, Raphaël van Steenberghe, David Turns, Vito Todeschini, Barbara Sonczyk, Lindsay Moir, Ludovica Poli, Tomoko Yamashita, Lenneke Sprik, Elena Katselli and Nicholas Tsagourias.

Science of Wood Degradation and its Protection Feb 13 2022 This edited book covers all aspects of wood degradation from its formation and growing in trees to its end usages when it is put into human usage. Wood is an age-old traditional fascinating material with a sensory-rich immersive experience that kindles aesthetics and creativity. The utility, durability, and functionality of wood render it a cosmopolitan material. It constitutes an integral part of human lives from ancient times to modern societies being used by various sectors viz., construction, furniture, panel products, paper and pulp, sports goods, agricultural implements, etc., Wood, being a biological material, is susceptible to degradation both by physical and biological means, and the need to protect the wood and prevent heavy economic losses constitutes a major challenge. Also, wood formed by the trees is the major sinks of carbon and the carbon remains locked-up for the life of the wood, thereby serving as important tool to mitigate the climate change. But the carbon stored in wood returns to the atmosphere when it degrades and will have positive effect on climate change. Hence, wood protection aiming for extending the service life of wood plays a key role in locking the carbon for a longer period in the wood and also substantially reduce the demand and depletion of forest resources. The book focuses on wood as an important natural bio-resource, inventory of wood protection, usage, utilization, preservatives, protection technologies and wood protection from all forms of degradation. Special focus is given on the eco-friendly way of protecting wood and its importance in mitigating climate change. The book is useful for Indian and international readers, who are working in wood domains. It is of interest to wood technologists, teachers, researchers, climate change scientists, capacity builders, and policymakers. It is of immense importance as a guide and study material to the graduate and postgraduate students of wood science in various universities of India and abroad.

Code of Federal Regulations, Title 40, Protection of Environment, Pt. 260-265, Revised As of July 1 2012 Sep 20 2022

How to Change Everything Aug 19 2022 “[A] uniquely inclusive perspective that will inspire conviction, passion, and action.” —Kirkus Reviews (starred review) An empowering, engaging young readers guide to understanding and battling climate change from the expert and bestselling author of *This Changes Everything* and *On Fire*, Naomi Klein. Warmer temperatures. Fires in the Amazon. Superstorms. These are just some of the effects of climate change that we are already experiencing. The good news is that we can all do something about it. A movement is already underway to combat not only the environmental effects of climate change but also to fight for climate justice and make a fair and livable future possible for everyone. And young people are not just part of that movement, they are leading the way. They are showing us that this moment of danger is also a moment of great opportunity—an opportunity to change everything. Full of empowering stories of young leaders all over the world, this information-packed book from award-winning journalist and one of the foremost voices for climate justice, Naomi Klein, offers young readers a comprehensive look at the state of the climate today and how we got here, while also providing the tools they need to join this fight to protect and reshape the planet they will inherit.

Strengthening Science at the U.S. Environmental Protection Agency--National Research Council (NRC) Findings May 04 2021

A New Generation Draws the Line Dec 31 2020 How do we understand the role and ethics of humanitarian intervention in today's world? This expanded and updated edition is timely as the West weighs intervention in Libyan civil war. Discussions of Libyan intervention involved the international principle of "the right to protect" (R2P). Chomsky dissects the meaning and uses of this international instrument in a new chapter. Other chapters from the book help readers understand the West's uses and abuses of "humanitarian intervention," which is not always what it seems, including detailed studies of East Timor and Kosovo. **Global Politics and the Responsibility to Protect** Nov 22 2022 This book provides an in-depth introduction to, and analysis of, the issues relating to the implementation of the recent Responsibility to Protect principle in international relations. The Responsibility to Protect (RtoP) has come a long way in a short space of time. It was endorsed by the General Assembly of the UN in 2005, and unanimously reaffirmed by the Security Council in 2006 (Resolution 1674) and 2009 (Resolution 1894). UN Secretary-General Ban Ki-moon has identified the challenge of implementing RtoP as one of the cornerstones of his Secretary-Generalship. The principle has also become part of the working language of international engagement with humanitarian crises and has been debated in relation to almost every recent international crisis – including Sudan, Sri Lanka, Myanmar, Georgia, the Democratic Republic of Congo, Darfur and Somalia. Concentrating mainly on implementation challenges including the prevention of genocide and mass atrocities, strengthening the UN's capacity to respond, and the role of regional organizations, this book introducing readers to contemporary debates on R2P and provides the first book-length analysis of the implementation agenda. The book will be of great interest to students of the responsibility to protect, humanitarian intervention, human rights, foreign policy, security studies and IR and politics in general.

Climate Change and Animal Health Jan 20 2020 This benchmark publication assembles information on the current and anticipated effects of climate change on animal health. It empowers educators, managers, practitioners, and researchers by providing evidence, experience, and opinions on what we need to do to prepare for, and cope with, the largest threat ever to have faced animals on this planet. With expert contributors from across the globe, the text equips the reader with information and means to develop sustainable adaptation or mitigation actions. After introducing animal health in a climate change context, chapters look at specific animal health impacts arising from climate change. The book concludes with suggestions on teachable and actionable ideas that could be used to mobilize concepts provided into education or advocacy. This book was written amid the COVID-19 pandemic and in the face of ever-increasing reports of on-the-ground, real-life climate impacts. Large scale wildfire and ocean heat waves killed unprecedented numbers of animals, while droughts in some areas and floods in others displaced thousands of livestock and made food scarce for even more. Climate change is real, and it is here. How we respond will have profound implications for people, biodiversity, welfare, conservation, societies, economies, and ecosystems. Today's veterinary educators are awakening to the need to adapt and train a new generation of animal health professionals who can understand and plan for climate change, and this book is an essential resource.

Switchgear & Protection Oct 09 2021 The knowledge of switchgear and apparatus protection plays an important role in the power system. The book is structured to cover the key aspects of the course Switchgear & Protection for undergraduate students. The book starts with the discussion of basics of protective relaying. The book includes comprehensive coverage of faults and analysis of symmetrical and unsymmetrical faults. The book explains the protection against overvoltage, lightning arresters and power system earthing. The book covers the characteristics of various types of relays such as electromagnetic relays, induction type relays, directional relays, differential relays, thermal relays, frequency relays and negative sequence relays. The detailed discussion of distance relays and static relays is also included in the book. The book also covers the various possible faults and methods of protection of transformers, generators, motors, busbars and transmission lines. The book further explains the theory of circuit interruption and various arc interruption methods. Finally, the book incorporates various types of circuit breakers, circuit breaker ratings and testing of circuit breakers. The book uses plain and lucid language to explain each topic. The book provides the logical method of explaining the various complicated topics and stepwise methods to make the understanding easy. Each chapter is well supported with necessary illustrations and self-explanatory diagrams. The book explains the philosophy of the subject which makes the understanding of the concepts very clear and makes the subject more interesting.

Security Sep 08 2021 Today, threats to the security of an organization can come from a variety of sources- from outside espionage to disgruntled employees and internet risks to utility failure. Reflecting the diverse and specialized nature of the security industry, *Security: An Introduction* provides an up-to-date treatment of a topic that has become increasingly complex.

Strengthening coherence between social protection and agricultural interventions - The case of Mali Dec 11 2021 This country report integrates methods, analysis and findings of two studies that explore the impact of a package of short-term humanitarian and recovery interventions in response to food crisis affecting poor and vulnerable livelihoods in Mali. The design of the studies, data collection and research were funded by the International Fund for Agricultural Development through the Universidad de los Andes for the project: “Improving the articulation between social protection interventions and rural productive development in developing countries: lessons from Latin America and Africa” and the FAO Regular Programme funds.

Beyond Cybersecurity Apr 03 2021 Move beyond cybersecurity to take protection of your digital business to the next level *Beyond Cybersecurity: Protecting Your Digital Business* arms your company against devastating online security breaches by providing you with the information and guidance you need to avoid catastrophic data compromise. Based upon highly-regarded risk assessment analysis, this critical text is founded upon proprietary research, client experience, and interviews with over 200 executives, regulators, and security experts, offering you a well-rounded, thoroughly researched resource that presents its findings in an organized, approachable style. Members of the global economy have spent years and tens of billions of dollars fighting cyber threats—but attacks remain an immense concern in the world of online business. The threat of data compromise that can lead to the leak of important financial and personal details can make consumers suspicious of the digital economy, and cause a nosedive in their trust and confidence in online business models. Understand the critical issue of cyber-attacks, and how they are both a social and a business issue that could slow the pace of innovation while wreaking financial havoc. Consider how step-change capability improvements can create more resilient organizations. Discuss how increased collaboration within the cybersecurity industry could improve alignment on a broad range of policy issues. Explore how the active engagement of top-level business and public leaders can achieve progress toward cyber-resiliency. *Beyond Cybersecurity: Protecting Your Digital Business* is an essential resource for business leaders who want to protect their organizations against cyber-attacks.

Privacy in Europe Aug 27 2020 As this Article goes to press, the European Union is embroiled in debates over the contours of a proposed new privacy regulation. These efforts, however, have lacked critical information necessary for reform. For, like privacy debates generally, they focus almost entirely on law “on the books” -- legal texts enacted by legislatures or promulgated by agencies. By contrast, they largely ignore privacy “on the ground” -- the ways in which corporations in different countries have operationalized privacy protection in the light of divergent formal laws, different approaches taken by local administrative agencies, and other jurisdiction-specific social, cultural, and legal forces. Indeed, despite the new regulation's central goal of harmonizing privacy across Europe by preempting today's enormous variation in national approaches, policymakers have been hobbled by an absence of evidence as to which national choices about privacy governance have proven more or less resilient in the face of radical technological and social change. Information about the relative strengths and benefits of the alternate regulatory approaches that have flourished in the “living laboratories” of the European member states is

largely undeveloped. This Article begins to fill this gap -- and at a critical juncture. Our "on the ground" project uses qualitative empirical inquiry -- including interviews with, and questionnaires completed by, corporate privacy officers, regulators, and other actors within the privacy field in three European countries, France, Germany and Spain -- to identify the ways in which privacy protection is implemented in different jurisdictions, and the combination of social, market, and regulatory forces that drive these choices. It thus offers a comparative "in-the-wild" assessment of the effects of the different regulatory approaches adopted by these three countries. In the face of novel challenges to privacy, leveraging the adaptability of distinct regulatory approaches and institutions has never been more important. As technological and social change has altered the generation and use of data, the definition of privacy that has prevailed in the political sphere -- individual control over the disclosure and use of personal information -- has increasingly lost its salience. In particular, the common instruments of protection generated by this definition -- procedural mechanisms to protect individual "choice" -- have offered an inapt paradigm for privacy protection in the face of data ubiquity and computing capacity. In developing new metrics for protecting privacy, policymakers must take into account a far more granular and bottom-up analysis of both differences in national practice and the forces on the ground that result in the diffusion -- or lack thereof -- of corporate structures and institutions that research suggests are most adaptive in protecting privacy in the face of change. Through such comparative analysis, this Article upends the terms of the prevailing policy debate, revealing the ways in which different regulatory choices have shaped corporate behavior. This analysis offers important insights for policymakers considering reform not just in Europe, but also in United States, where Congress, the Federal Trade Commission, and the Obama administration have all expressed a willingness to reexamine deeply the current regulatory structure, and a desire for new models. And, more broadly, it underscores the importance of administrative agencies' choices about regulatory tools and approaches, relations with those that they regulate, and their own internal structures in shaping the mindset and behavior of the private firms they govern to maximize public values.

Automatic Control Jan 12 2022

Antarctic Ecosystems Jun 24 2020 Since its discovery Antarctica has held a deep fascination for biologists. Extreme environmental conditions, seasonality and isolation have lead to some of the most striking examples of natural selection and adaptation on Earth. Paradoxically, some of these adaptations may pose constraints on the ability of the Antarctic biota to respond to climate change. Parts of Antarctica are showing some of the largest changes in temperature and other environmental conditions in the world. In this volume, published in association with the Royal Society, leading polar scientists present a synthesis of the latest research on the biological systems in Antarctica, covering organisms from microbes to vertebrate higher predators. This book comes at a time when new technologies and approaches allow the implications of climate change and other direct human impacts on Antarctica to be viewed at a range of scales; across entire regions, whole ecosystems and down to the level of species and variation within their genomes. Chapters address both Antarctic terrestrial and marine ecosystems, and the scientific and management challenges of the future are explored.

Climate Change Economics and Policy Feb 19 2020 What are the potential adverse impacts of climate change? How can society determine the amount of protection against climate change that is warranted, given the benefits and costs of various policies? In concise, informative chapters, *Climate Economics and Policy* considers the key issues involved in one of the most important policy debates of our time. Beginning with an overview and policy history, it explores the potential impact of climate change on a variety of domains, including water resources, agriculture, and forests. The contributors then provide assessments of policies that will affect greenhouse gas emissions, including electricity restructuring, carbon sequestration in forests, and early reduction programs. In considering both domestic and international policy options, the authors examine command and control strategies, energy efficiency opportunities, taxes, emissions trading, subsidy reform, and inducements for technological progress. Both policymakers and the general public will find this volume to be a convenient and authoritative guide to climate change risk and policy. It is a useful resource for professional education programs, and an important addition for college courses in environmental economics and environmental studies. *Climate Economics and Policy* is a collection of Issue Briefs, prepared by the staff of Resources for the Future (RFF) and outside experts. Many are adapted from pieces originally disseminated on Weathervane, RFF's acclaimed web site on global climate change.

The Changing Nature of Corporate Social Responsibility Jul 18 2022 Corporate Social Responsibility (CSR) has increasingly been promoted as an important mechanism for furthering economic and social development goals in developing countries. In such an optimistic climate, questions arise as to whether CSR can bear the weight of the increasing expectations being heaped on its shoulders. This book examines the changing nature of corporate social responsibility as it has been conceived over the past eighty years. It considers the historical and socio-legal developments of the idea of CSR and the various conceptions of the corporation which underlie different realisations of CSR. The book explores the model of CSR deployed in the developing world as well as the links between CSR and development. Renginee Pillay uses Mauritius as a case-study, demonstrating how CSR and corporate governance issues have come to the fore of political, financial and legal landscapes. Drawing on empirical research, the book examines how the first legislation of its kind has been implemented in Mauritius, and analyses its impact on development. In its work to evaluate the contribution CSR can make to development, this book will be of great use and interest to students and researchers of business and company law, business ethics, and development studies.

Fifty Years at the US Environmental Protection Agency Jul 26 2020 In conjunction with the 50th anniversary of the creation of the Environmental Protection Agency, this book brings together leading scholars and EPA veterans to provide a comprehensive assessment of the agency's key decisions and actions in the various areas of its responsibility. Themes across all chapters include the role of rulemaking, negotiation/compromise, partisan polarization, judicial impacts, relations with the White House and Congress, public opinion, interest group pressures, environmental enforcement, environmental justice, risk assessment, and interagency conflict. As no other book on the market currently discusses EPA with this focus or scope, the authors have set out to provide a comprehensive analysis of the agency's rich 50-year history for academics, students, professional, and the environmental community.

Report and Documentation of the Expert Workshop on Marine Protected Areas and Fisheries Management Apr 22 2020 This document contains the report of the workshop and the background papers commissioned for the meeting. The report, and in particular the 'Key Points' adopted by the workshop, will serve as basis for further work on developing technical guidelines for the design, implementation and review of MPAs.

Echinoderms: Munchen Sep 27 2020 Since 1972, scientists from all over the world working on fundamental questions of echinoderm biology and palaeontology have conferred every three years to exchange current views and results. The 11th International Echinoderm Conference held at the University of Munich, Germany, from 6-10 October 2003, continued this tradition. This volume comprises 95 submitted papers and 96 abstracts covering a wide spectrum from innovative student contributions to the lessons learnt from experienced specialists. The content of the contributions ranges from original research results to the latest synopses concerning a variety of topics, including visual sensing, larval cloning, mutable collagenous tissues, sea urchin aqua-culture, deuterostome phylogeny, palaeobiology and taphonomy.

Estate and Gift Tax Carryover Basis and Generation-skipping Trust Provisions and Deductibility of Foreign Convention Expenses Oct 21 2022

The Pivotal Generation Aug 07 2021 "We all recognize that climate change is a supremely important issue of our time, which requires both trans-national and trans-generational collaboration and shared responsibility. What we haven't yet fully appreciated, argues political philosopher Henry Shue, are the ethical considerations surrounding the fact that the next one or two decades will determine whether climate change, which already has led us to dangerous effects, will surge into inescapably disastrous effects. The people alive today thus represent a pivotal generation in human history. For the past two centuries humans have undermined our climate at an increasing rate, in ways that the present generations are the first to fully understand, and the last to be able to reverse. But our responsibility for decisive and immediate action rests on three special features of the relation of our present to the future, that many have failed to realize (1) future generations face dangers greater than ours even if we act robustly, (2) the worsening dangers for future generations are currently without limit, and (3) a less robust effort by us is likely to allow climate change to pass critical tipping points for severely worse and potentially unavoidable future dangers. Shue, a renowned scholar of ethics, politics and international relations who has been studying the ethics of climate change for the last two decades, guides us through what our ethical responsibilities to others are, both across the world but especially over time, and what those commitments require us to do in addressing the climate change crisis, now and forcefully"--

Creating Business Agility Mar 22 2020 *Creating Business Agility: How Convergence of Cloud, Social, Mobile, Video, and Big Data Enables Competitive Advantage* provides a game plan for integrating technology to build a smarter, more customer-centric business. Using a series of case studies as examples throughout, the book describes the agility that comes from collaborative commerce, and provides key decision makers the implementation roadmap they need to build a successful business ecosystem. The focus is on Business Agility Readiness in terms of the five major changes affecting the information technology landscape, and how data-driven delivery platforms and decision-making processes are being reinvented using digital relationships with a social business model as the consumer world of technology drives innovation and collaboration. Cloud computing, social media, next-gen mobility, streaming video, and big data

with predictive analytics are major forces now for a competitive advantage, and Creating Business Agility provides leaders with a roadmap for readiness. Business leaders tasked with innovation and strategy will find that Creating Business Agility provides important insight from an informed perspective.

Domain Names Rewired Dec 23 2022 An essential guide to navigating the shifting Internet landscape The Internet is about to profoundly change when it explodes from a 21 top level domain world to a 500 to a 1,000 .anything top level domain universe. How will you evolve your .com strategy? How will you keep your brands safe in the changing global Internet landscape? In an economic time where global brand protection is more important than ever and budgets are leaner, project leaders inside corporations will welcome the strategies revealed in Domain Names Rewired. Written for executives and branding professionals, this timely book equips you with the tools to address important issues your company will face when creating new brands or derivative brands, as well as protecting your existing brands and .com in a global changing Internet landscape. With this book, authors Jennifer C. Wolfe and Anne H. Chasser skillfully show branding executives and intellectual property lawyers how to increase the value and success of their initiatives within the next generation of the Internet. Features interviews with executives from the world's leading companies, including Procter & Gamble, Microsoft, Time Warner, Yahoo!, Neustar, AUS Registry, ICANN, Remax, the International Trademark Association, Verizon, and many others Looks at relevant situations your corporation may deal with in creating new brands Provides expert guidance for protecting your existing .com and brand in an exponentially changing Internet world Offers ideas to consider disruptive innovation in expanding .com into .anything The rapidly changing new regime of the Internet is impacting the hundreds of millions of Internet users around the globe, not to mention every business that already has a .com. Maximize your opportunities in the changing digital world and stay ahead of the competitors with the visionary strategies found in Domain Names Rewired.

How To Create A Better World Dec 19 2019 This earth is dying, and you want to find ways to save it? If so, this book will help you. In this book, you will learn how to change the way you live your life, change your habits and you will have to adopt values that will allow this to happen.

Reducing Poverty, Protecting Livelihoods, and Building Assets in a Changing Climate May 24 2020 This book is simply a must for all those concerned by climate change.---

The Intersectional Environmentalist Jul 06 2021 We cannot save the planet without uplifting the voices of its people - especially those most often unheard. Leah Thomas coined the term 'intersectional environmentalism' to describe the inextricable link between climate change, activism, racism and privilege. The fight for the planet should go hand in hand with the fight for civil rights. In fact, one cannot exist without the other. This book is a call to action, a guide to instigating change for all and a pledge to work toward the empowerment of all people and the betterment of the planet - an indispensable primer for activists looking to create meaningful, inclusive and sustainable change. Driven by Leah's expert voice and complemented by the words of young activists from around the globe, it is essential reading on the issue - and the movement - that will define a generation.

DSE Apr 15 2022

New Generation Draws the Line Mar 02 2021 How do we understand the role and ethics of humanitarian intervention in today's world? This expanded and updated edition is timely as the West weighs intervention in Libyan civil war. Discussions of Libyan intervention involved the international principle of "the right to protect" (R2P). Chomsky dissects the meaning and uses of this international instrument in a new chapter. Other chapters from the book help readers understand the West's uses and abuses of "humanitarian intervention," which is not always what it seems, including detailed studies of East Timor and Kosovo.

Beyond Responsibility to Protect Mar 26 2023 This book explores the extent to which Responsibility to Protect shifts our understanding of both the potential and practice of international law.

Revelation Mar 14 2022 Revelation is part one of a year long study into UK Child Abduction and highlights the connection between the UK Governments failure to act - on what was - Government set promises to parents. The rapidly changing landscape that is UK Child Abduction, whilst topical, is not fully understood at a parental level. Keeping it clandestine is failure to recognising its omnipresence in our lives. Raising questions like - How was it possible for paedophiles to secure some of the best Government jobs? What will this cost us? What will we tell our children and how can we protect them? Prepare for a revelation and be prepared to change your opinion.

Protecting the World's Oceans Jun 17 2022 The World Ocean Conference (WOC) 2009 and Coral Triangle Initiative (CTI) Summit week was the first large-scale international event to bring together both ocean and climate change stakeholders and specialists. The presentations and panel discussions held during WOC 2009 highlighted the central role of oceans in the climate change response, drew attention to the resulting challenges for oceans and small-island developing states (SIDSs), and called on all stakeholders led by governments and their development partners, nongovernment organizations, and the private sector to take immediate action to adapt to or mitigate the impacts of climate change. This publication is a summary of the major and recurring themes discussed during that week.

Social Protection of the Next Generation in Europe:EISS Yearbook, 1997 Nov 29 2020 This Yearbook focuses on the social security systems of tomorrow. The twentieth century has witnessed the birth of the welfare state, but changes in the societal structure have led some to question how well it will survive into the millennium. These changes include the demographic trend toward increased life expectancy and decreased fertility, The battle between individualism of the free market And The traditional solidarity structures of the welfare state, And The pressures that will be placed upon the children of tomorrow to integrate into a changing labour market. The papers in Social Protection of the Next Generation in Europe address these problems on an individual, national, and supra-national level. The contributors advance solutions To The potential problems posed that aim to improve efficiency, stimulate economic growth, distribute income fairly, reduce poverty, and prevent social exclusion. A special section about the evolution of social protection in Estonia introduces the reader to some of the additional social and political problems faced by eastern European states as they attempt to tackle the same pressing obstacles that face the West. This Yearbook will inform and appeal to social and economic research institutions, employee organizations and trade unions, social policy organizations, and government officials. it offers readers insight into issues and problems that may affect social security in the future as well as innovative assessments of such goals as economic growth, improved efficiency, increased employment, fairer income distribution, And The reduction of poverty and social exclusion. it also offers innovative means for both the Eastern and Western European states to achieve those ends as we approach a new millennium.
