Cinemas of Hertfordshire Aug 29 2020 There have been many changes since the first edition of this publication appeared in 1984. In addition to the closure of many more local cinemas, there has been the growth of the multiplexes so the picture is not entirely black. It is written by Alan Eyles, a fulltime specialist researcher and writer on the history of cinema. The new edition has twice the number of pages as the first and nearly 200 photographs including many which have been uncovered by the author in the last 20 years. It includes every cinema which has opened in Hertfordshire since 1908 (when the first opened its doors) and is arranged by town for ease of reference.

State-Sponsored Inequality Dec 21 2019 This book explores the social economic processes of inequality in nineteenth- and early-twentieth-century rural China. Drawing on uniquely rich source materials, Shuang Chen provides a comprehensive view of the creation of a social hierarchy wherein the state classified immigrants to the Chinese county of Shuangcheng into distinct categories, each associated with different land entitlements. The resulting patterns of wealth stratification and social hierarchy were then simultaneously challenged and reinforced by local people. The tensions built into the unequal land entitlements shaped the identities of immigrant groups, and this social hierarchy persisted even after the institution of unequal state entitlements was removed. State-Sponsored Inequality offers an in-depth understanding of the key factors that contribute to social stratification in agrarian societies. Moreover, it sheds light on the many parallels between the stratification system in nineteenth-century Shuangcheng and structural inequality in contemporary China.

Dictionary for Business & Finance Jan 22 2020 Defines terms used in business, economics, statistics, and management, and includes appendices for abbreviations, ratios, formulas, and equations.

Two Decades of Reform in China May 26 2020 A planned economy system was set up in China in 1949, & its reform was launched in 1979. The reform has gone on for 20 years & has achieved globally recognized success. This book summarizes the successful experiences & points out the difficulties of the deep reform & the prospects for the 21st century. Rich in historical data & material, it provides valuable information for readers from universities, institutions & enterprises as well as government officials - whoever is interested in China & its economic reform. The author, a famous Chinese economist, has been involved in the leadership of the Chinese economic system's reform since its launch in 1979. In 1998 he was invited by the World Bank to give a series of seminars on China's economic reform, & most of the contents of those seminars are included in this book. Contents: Basic Achievements of Economic Reform; Basic Experiences of Economic Reform; Adjustment of China's Ownership Structure; Enterprises Reforms & Capital Market Development; The Labor Force Market; Institutional Reforms of China's Government; How to Dissolve the Negative Influence of Asian Financial Crisis on China.

Survey of Current Business Feb 21 2020

The Palgrave Encyclopedia of Peace and Conflict Studies Sep 10 2021

This encyclopaedia provides a comprehensive overview of major theories and approaches to the study of peace and conflict across different humanities and social sciences disciplines. Peace and conflict studies (PCS) is one of the major sub-disciplines of international studies (including political science and international relations), and has emerged from a need to understand war, related systems and concepts and how to respond to it afterward. As a living reference work, easily discoverable and searchable, the Palgrave Encyclopedia of Peace and Conflict Studies offers solid material for understanding the foundational, historical, and contemporary themes, concepts, theories, events, organisations, and frameworks concerning peace, conflict, security, rights, institutions and development. The Palgrave Encyclopaedia of Peace and Conflict Studies brings together leading and emerging scholars from different disciplines to provide the most comprehensive and up-to-date resource on peace and conflict studies ever produced.

Individualism and Collectiveness in Intellectual Property Law Jul 08 2021

This title embraces fundamental, eternal and yet very contemporary

elements in IP law dealt with in all parts of the world.

The Mahler Symphonies Apr 29 2023 "Hurwitz describes the emotional extravagance that lies at the root of Mahler's popularity, the consistency of his symphonic thinking, and his dazzling and revolutionary use of orchestral instruments to create an expressive musical language that is varied in content and immediate in impact."--BOOK JACKET.

A/V A to Z Jun 26 2020 Defining more than 10,000 words and phrases from everyday slang to technical terms and concepts, this dictionary of the audiovisual language embraces more than 50 subject areas within film, television, and home entertainment. It includes terms from the complete lifecycle of an audiovisual work from initial concept through commercial presentation in all the major distribution channels including theatrical exhibition, television broadcast, home entertainment, and mobile media. The dictionary definitions are augmented by more than 700 illustrations, 1,600 etymologies, and nearly 2,000 encyclopedic entries that provide illuminating anecdotes, historical perspective, and clarifying details.

How Family Firms Differ Feb 03 2021 Family firms account for a large proportion of firms in most countries. In industrialised countries of North America and Western Europe, they generally account for a large share of small and medium sized enterprises. In emerging market economies such as India, they also account for the majority of the large firms. Their importance for factors such as employment creation notwithstanding, relative to the widely held Anglo-Saxon firms, which are ubiquitous in the economics, finance and management literatures, family firms have historically received much less attention from scholars of these disciplines. However, in part owing to increased focus on emerging markets, there is a growing literature on family firms. In *How Family Firms Differ*, the authors explore important aspects of family firms, drawing on the existing literature and their own research on these firms.

Handbook on Insurance Coverage Disputes, 20th Edition Jan 26 2023 The Handbook on Insurance Coverage Disputes has been in a constant state of development and expansion since its original publication in 1988. The continuously evolving scope and content of the Handbook reflects the thousands of decisions rendered by courts on insurance coverage issues over the past quarter century. Since its initial publication, the Handbook has been cited in more than 350 court opinions. The Twentieth Edition of the Handbook reflects numerous recent developments, trends and emerging issues in insurance law across a variety of substantive topics. Noteworthy new cases and in-depth case law analyses have been included in this new updated edition of the Handbook. Additionally, important changes in jurisdictional law on several topics of insurance and reinsurance law are reflected in this edition. Note: Online subscriptions are for three-month periods. Previous Edition: Handbook on Insurance Coverage Disputes, Nineteenth Edition, ISBN 9781454879824

Population Pressure and Management of Natural Resources Mar 24 2020

What Ownership's All about Sep 22 2022 When an attack on capitalism and totalitarianism runs amok, the Syrovys attempt to remain in their apartment despite repeated attempts by their landlord to oust them.

The Dwarf Jan 02 2021 The dark side of South Korea's economic miracle emerges in *The Dwarf*, Cho Se-hui's enormously popular and critically acclaimed work. First published in 1978, it speaks to the painful social costs of reckless industrialization, even as it tellingly portrays the spiritual malaise of the newly rich and powerful and a working class subject to forces beyond its control. Cho's lean, clipped, deceptively simple style, the rapidly shifting points of view, terse dialogue, and subtle irony evoke the particularities of life in 1970s South Korea in the presence of global economic forces. The desperate realities of life for the dwarf, the proverbial little guy upon whose back Korea's economic transformation largely took place, are emotively rendered in twelve linked stories examining the lives of a laboring family, a family of the newly emerging middle class, and that of a wealthy industrialist.

China and Southeast Asia Mar 04 2021 All this is not surprising, even understandable. But the danger of exaggeration to the point where efforts to predict what China and the Chinese will do become merely alarmist, and the predictions become self-fulfilling, has to be guarded

against.

Fleeing Footsteps Feb 15 2022 The Hindu-Arabic numeral system (1, 2, 3, ...) is one of mankind's greatest achievements and one of its most commonly used inventions. How did it originate? Those who have written about the numeral system have hypothesized that it originated in India; however, there is little evidence to support this claim. This book provides considerable evidence to show that the Hindu-Arabic numeral system, despite its commonly accepted name, has its origins in the Chinese rod numeral system. This system was widely used in China from antiquity till the 16th century. It was used by officials, astronomers, traders and others to perform addition, subtraction, multiplication, division and other arithmetic operations, and also used by mathematicians to develop arithmetic and algebra. Based on this system, numerous mathematical treatises were written. Sun Zi suanjing (The Mathematical Classic of Sun Zi), written around 400 A.D., is the earliest existing work to have a description of the rod numerals and their operations. With this treatise as a central reference, the first part of the book discusses the development of arithmetic and the beginnings of algebra in ancient China and, on the basis of this knowledge, advances the thesis that the Hindu-Arabic numeral system has its origins in the rod numeral system. Part Two gives a complete translation of Sun Zi suanjing. In this revised edition, Lam Lay Yong has included an edited text of her plenary lecture entitled "Ancient Chinese Mathematics and Its Influence on World Mathematics", which was delivered at the International Congress of Mathematicians, Beijing 2002, after she received the prestigious Kenneth O. May Medal conferred by the International Commission on the History of Mathematics. This should serve as a useful and easy-to-comprehend introduction to the book.

J.K. Lasser's Your Income Tax 2011 Nov 12 2021 America's number one bestselling and most trusted tax guide offers the best balance of thoroughness, organization, and usability For over half a century, more than 39 million Americans have turned to J.K. Lasser for easy-to-follow, expert advice and guidance on planning and filing their taxes. Written by a team of tax specialists, J.K. Lasser's Your Income Tax 2011 includes all the outstanding features that have made this book the nation's all-time top-selling tax guide. As an added value, you can gain direct access to dozens of bonuses through jklasser.com, including links to the latest tax forms from the IRS, up-to-the-minute tax law changes, small business help, and much more. The book of choice for today's serious taxpayer Your Income Tax 2011 contains Over 2,500 easy-to-use tax planning tips and strategies Easy-to-understand coverage of the year's tax law changes Filing tips and instructions to help you prepare your 2010 return Quick reference section that highlights what's new for 2010 Quick topic index to help pinpoint the biggest money-saving deductions Advice for customers whose use software or CPAs to file their taxes Filled with expert advice and guidance, J.K. Lasser's Your Income Tax 2011 will help you plan and file your 2010 tax return in the most efficient way possible.

Housing and Young Families in East London Oct 11 2021

Official Gazette of the United States Patent and Trademark Office Dec 01 2020

Housing and Home Unbound Jun 19 2022 Housing and Home Unbound pioneers understandings of housing and home as a meeting ground in which intensive practices, materials and meanings tangle with extensive economic, environmental and political worlds. Cutting across disciplines, the book opens up the conceptual and empirical study of housing and home by exploring the coproduction of the concrete and the abstract, the intimate and the institutional, the experiential and the collective. Exploring diverse examples in Australia and New Zealand, contributors address the interleaving of money and materials in the digital commodity of real estate, the neoliberal invention of housing as a liquid asset and source of welfare provision, and the bundling of car and home in housing markets. The more-than-human relations of housing and home are articulated through the role of suburban nature in the making of Australian modernity, the marketing of nature in waterfront urban renewal, the role of domestic territory in subversive social movements

such as Seasteading and Tiny Houses, and the search for home comfort through low-cost energy efficiency practices. The transformative politics of housing and home are explored through the decolonizing of housing tenure, the shaping of housing policy by urban social movements, the lived importance of marginal spaces in Indigenous and other housing, and the affective lessons of the ruin. Beginning with the diverse elements gathered together in housing and home, the text opens up the complex realities and possibilities of human dwelling.

Law of Property Rights Protection Dec 25 2022 The on-going battle between government's desire to regulate private property use and property owners' equally powerful desire to avoid economically damaging or unreasonable limitations on their property is one of the most emotionally charged and fiercely contested issues in contemporary law. An enormous amount of litigation at every level of government has stemmed from questions surrounding the timing and amount of government compensation to an owner of regulated property. The relevant law has undergone a complete transformation over the past decade, so count on the Law of Property Rights Protection to bring you completely up to date. Organized according to the major elements of a property rights case, the book: Analyzes the case law and identifies which challenges were successful, what fact patterns proved compelling, and what tactics have failed. Offers advice on how best to handle common situations Covers the full range of property, drawing on recent cases involving contract rights, lease hold rights, an unpatented mining claim, the possibility of reverter, the right of entry, the use of water power, and the right to exclude members of the public from a shopping center. Using Laitos' strategic approach will help you formulate your own arguments and handle taking cases with confidence.

Handbook on Insurance Coverage Disputes, 21st Edition Feb 27 2023

The Economics of Property Rights Jul 20 2022 To understand recent developments in Eastern Europe requires a method of analysis that is capable of internalizing into a theoretical framework (i) the logical premises deduced from the costs of transactions and incentive structures generated by various institutions and (ii) the evidence for refutable implications of those premises. The economics of property rights is such a theory. It expands the scope of the ability of economic analysis to explain a wide range of institutional structures and provides empirical corroboration of its logical implications. The economics of property rights is, then, an effective scholarly instrument that offers more significant understanding of the three current issues in the area of comparative economic studies: (i) evaluating the performance of alternative institutional arrangements, (ii) explaining the failure of socialist institutions in Eastern Europe, and (iii) identifying the costs (political as well as economic) of institutional reforms in that part of the world. In that sense, the book is both timely and relevant. In the late 1980s East Europeans crossed the threshold of fear and forced their leaders to abandon Marxism. With that theory of history dead and buried, the cost of current sacrifices in the pursuit of socialism has risen relative to the present value of its expected future benefits.

Carbon Capture and Sequestration Aug 21 2022 The United States produces over seventy per cent of all its electricity from fossil fuels and nearly fifty per cent from coal alone. Worldwide, forty-one per cent of all electricity is generated from coal, making it the single most important fuel source for electricity generation, followed by natural gas. This means that an essential part of any portfolio for greenhouse gas emissions reductions will be technology to capture carbon dioxide and permanently sequester it in suitable geologic formations. While many nations have created incentives to develop of CCS technology, large regulatory and legal barriers exist that must still be addressed. This book identifies current law and regulation that applies to geologic sequestration in the U.S., the regulatory needs to ensure that geologic sequestration is carried out safely and effectively, and barriers that current law and regulation present to timely deployment of CCS. The authors find the three most significant barriers to be: an ill-defined process to access pore space in deep saline formations; a piecemeal, procedural and static permitting system; and the lack of a clear, responsible plan to address long-term liability associated with sequestered CO₂. The book provides legislative options to remove these barriers and address the regulatory needs, and makes recommendations on the best options to encourage safe, effective deployment of CCS. The authors propose recommendations in legislative language, which is of particular use to policy makers faced with the challenge of addressing climate change and energy

Official Code of Georgia Annotated Dec 13 2021

The Health Benefits of Dog Walking for Pets and People Jun 07 2021

Obesity is at epidemic levels worldwide. In the U.S. alone, it is estimated that by 2018 the cost of treating weight-related illnesses will double to almost \$350 billion a year. A 2010 report by the U.S. Surgeon General estimates that two-thirds of American adults and almost one in three children are now overweight or obese. Similar statistics emphasize the staggering problem in other industrialized countries. This volume originated in a special 2009 symposium funded in part by a grant from the Eunice Kennedy Shriver National Institute of Child Health and Development (NICHD) and sponsorship from Mars-WalthamTM on how human-animal interaction may help fight obesity across the lifespan. It provides systematic presentation of the scientific evidence for this powerful expression of the benefits of the human-animal bond. The volume will be especially valuable as a sourcebook of evidence-based studies for public health professionals treating overweight humans and veterinarians treating obese dogs.

Handbook on Insurance Coverage Disputes, 19th Edition Mar 28 2023 Handbook on Insurance Coverage Disputes

Land Law in Nigeria Jan 14 2022 This study, in nineteen chapters, deals with the various issues pertaining to land law in Nigeria. Namely: Concept of ownership; ownership and communal land holding under customary land tenure; individual land ownership; family land ownership; alienation under customary law; nature of customary tenancy; pledge; the law of property; an overview of the effect of the Land Use Act on customary ownership of land; The Nigerian Land Use Act; Land Use Act 1978; ways of declaration of title to land; legal mortgage; the position of landlord and tenant; the procedure for recovery of premises under the recovery of premises law; classification of right of occupancy; nature of prescription; march towards the reform of the Land Use Act.

Claiming Ownership in Postwar Croatia Nov 24 2022 The book analyses inter-group relations in a war-torn region of postsocialist Croatia which previously had a large Serbian population. The focus is on the legitimising discourses, structures and agencies which regulate access to houses and land. It explores the role of ethnicity and locality in everyday life and in politics and shows that the views of Knin Croats often diverge from those of recent Croatian immigrants. The study contributes to theories of conflict and reconciliation as well as to the anthropology of postsocialism and legal anthropology.

Alexander McDonald Oct 31 2020

Housing, Welfare, and the State in Europe Sep 29 2020 This text identifies a divergence in housing policy between a majority of relatively affluent owner-occupiers and a minority of badly housed or homeless. The well-housed majority have preoccupied public policy across Europe, and this trend has been particularly noticeable in Britain, with elections won and lost on the level of the mortgage rate rather than the level of housing output. The author offers insights into the future direction of public policy as a whole, the balance between economic and social goals, and the relative emphasis given to free markets and state intervention in a variety of countries.

Women's Entrepreneurship and Economics Apr 05 2021 Over the past century, an extensive literature has developed, exploring the impact of entrepreneurship on economic performance. The active participation of entrepreneurs in virtually all aspects of business and economic activity has obliged policy makers within the global economy to consider entrepreneurship as a determining variable in any political force, not only for bodies and groups created specifically to this end, but also for any decision-making body. To this end, specific actions promoting entrepreneurship have already been established around the world. However, the particular dynamics of entrepreneurship by women present

unique opportunities and challenges. The women's perspective has often been overlooked in research, practice, and policymaking, and yet yields rich insights and implications. This volume features research from an international array of authors, global data, and in-depth analysis of women's entrepreneurial activity in Europe, Latin America, the United States, and Canada, to shed light on the positive impact of women's entrepreneurship on economic growth and development. The first part covers a broad range of concepts relating to the history and context of the female economic perspective. The second part focuses on performance and success factors, with respect to such issues as innovation, social needs, and entrepreneurial orientation. The third part addresses issues of financing, including discussion of access to capital, microcredit, and entrepreneurial behavior. The fourth part considers additional topics, such as work-family balance and access to education. Together, the chapters offer new perspectives on the unique characteristics of women entrepreneurs and their contributions to economic development in theory, practice, and policymaking.
